

evolution

The evolution continues!

The **Evolution** range provides a truly versatile drinks vending solution for all environments where a high quality beverage needs to be served quickly and efficiently. The machines offer a full range of instant, freshbrew and bean to cup drinks, an extensive selection of still and carbonated cold drinks and now you can “enjoy more” with the new 12oz model* which brings the coffee shop experience to your business or workplace.

Evolution machines are also environmentally friendly! The latest **power save** software reduces energy consumption whilst keeping the machine “vend ready”. A bean to cup Evolution in power save mode now uses 33.6% less energy than when in idle mode while the Instant model uses 28.6% less energy.

* The 12oz “enjoy more” Evolution is a standard machine available in silver only, fitted with a different cup drop unit and cup turret that dispenses 12oz paper cups.

Choice of Selection Method

The Evolution offers a choice of two selection methods, the build-a-drink keypad (left) and a traditional numeric keypad (below), to suit any environment.

The build-a-drink keypad has user friendly back-lit buttons making it easy to use. The build-a-drink approach is intuitive with the selections and pricing clearly displayed.

An enlarged LCD display provides clear and concise information.

Enjoy a delicious freshly brewed tea or coffee beverage!

The single freshbrew Evolution incorporates a paper brewer producing high quality freshbrew drinks from either pre-ground coffee or leaf tea.

The double freshbrew model features a compact, paperless double brewer capable of delivering both freshbrew tea and coffee selections through the same unit.

Motorised Dispense Head

- Provides 3 dispense positions for hot drinks, cold drinks and hot water
- Prevents cross contamination between vends

Product Branding

- Large graphic areas can be easily customised
- Advertise product promotions or display branded products

Flexible Cup Drop Unit

- Large cup capacity (approx 600, 70z cups)
- Dispense either paper or plastic cups from 70z to 90z sizes
- Consistent, error free cup delivery
- 12oz model capacity (approx 400, 280ml cups)

SureVend™ Guaranteed Product Delivery

The **SureVend™** product delivery feature guarantees that the selected drink is only dispensed when sensors detect a cup in the dispense area. The system works by attempting to drop a cup up to 3 times. After 3 attempted vends the customer is given the option of using their own mug or accepting a refund.

Bean to Cup or Freshbrew Coffee...

...the choice is yours!

The Evolution bean to cup features the compact CoEx® brewer which allows both full flavoured bean to cup selections as well as freshbrew coffee to be produced from a single unit.

Now you can savour the aroma and full flavour of coffee brewed from the bean or enjoy a long smooth freshly brewed filter coffee suitable for all day drinking, from the same machine.

The Evolution Bean to Cup Advantage:

- Produces low pressure freshbrew coffee and high pressure bean to cup selections from single, compact CoEx® unit
- Versatile CoEx® unit also allows bean to cup coffee selections to be brewed under low pressure
- Consistent drink quality from every vend
- Paper cups for that authentic coffee house experience.
- 12oz model increases the experience with more aroma, more taste and more enjoyment
- Simple lever operated locking device facilitates removal of CoEx® brewer. Unit can be quickly and easily cleaned in hot water
- Optional freshbrew tea brewer

Evolution machines fitted with either the CoEx® or double freshbrew brewer must be fitted with a water hardness reducing filter. Crane Merchandising Systems recommend and supply the Brita AquaQuell compact water filter.

Why choose Evolution?

- Instant, freshbrew and bean to cup models available
- Numeric or build-a-drink keypad increases versatility
- Power save mode reduces energy consumption but keeps the machine “vend ready”
- 12oz model brings the coffee shop experience to your business or workplace
- Unique CoEx® brewer produces true espresso based selections from beans plus traditional freshbrew coffee
- **SureVend™** guaranteed product delivery system fitted as standard
- Flexible cup drop unit capable of vending paper and plastic cups

The Perfect Combination

Place the Evolution with snack, food and combination machines from the Crane Merchandising Systems range to create a total vending solution tailored to the needs of specific staff/customer preference or location.

Select your favourite from the Evolution's superb drinks menu!
